

4. Database Layer

- MongoDB: Stores users, bookings, inventory, reviews.

5. Messaging Layer

- RabbitMQ: Async communication between microservices.

4.3 Database Design

4.3.1 ER Diagram

Entities:

- **User:** Stores user details (userId, name, email, phone).
- **Booking:** Stores booking details (bookingId, userId, source, destination, bookingDate, status).
- **Inventory:** A nested document within Booking, storing a list of items (itemName, quantity, isFragile).
- **Mover:** Stores mover details (moverId, name, vehicleDetails).
