

```

    <Text style={styles.itemTitle}>{itemName}</Text>
    {isFragile && <Text style={styles.tag}>Fragile</Text>}
  </View>

  <View style={styles.counterContainer}>
    <TouchableOpacity onPress={handleDecrement} style={styles.button}>
      <Text style={styles.btnText}>-</Text>
    </TouchableOpacity>

    <Text style={styles.count}>{quantity}</Text>

    <TouchableOpacity onPress={handleIncrement} style={styles.button}>
      <Text style={styles.btnText}>+</Text>
    </TouchableOpacity>
  </View>
</View>
);
};

const styles = StyleSheet.create({
  card: {
    flexDirection: 'row',
    justifyContent: 'space-between',
    padding: 15,
    backgroundColor: '#fff',
    marginBottom: 10,
    borderRadius: 8,
    elevation: 3
  },
  // ... other styles
});

export default InventoryItem;

```

Status Explanation:

This component is **80% complete**. It utilizes Redux for state management, ensuring that when a user adds items on the inventory screen, the data is accessible on the subsequent "Checkout" screen for the API call.
